

EBRS setup

1. clone the 2TB EBRS image
 - image has ebrs_dc and ebrs_facility.
 - Has Nginx, couchdb, passenger
2. delete unwanted application directory
3. get correct facility/district code
 - rails c
 - HealthFacility.by_name.key("Ntchisi District Hospital").first.id
 - '1210'
4. set correct district code in couchdb.yml
5. create ssl keys for nginx
 - cd /opt/nginx/ssl ** is ssl folder not present create it
 - sudo openssl req -x509 -nodes -days 365 -newkey rsa:2048 -keyout nginx_key.key -out nginx_cert.crt
6. comment out correct block in Nginx
7. create production secret
 - run bundle exec rake secret
 - copy output and paste in secrets.yml
8. to set up application:
 - bundle exec rake ebrs:setup
